The Outs Move In

The natural inclination in the United States is to search for points of significance in the Canalian election which supplanted a Conservative amjority in the house of commons with a Liberal majority It is cesentlat to remember at the outset

of the search that the purty lerms Con servative and Liberal are not literal. The Conservative party though traditionally friendly to the interests of hig business departed abruptly from that basis early this year by wholesale abandonment of old prin ciples and adoption of a sweeping new deal resembling the new deal of the United

The Causdian election like the 1937 election in this country resulted in a change of administrations not because Lib ral prin ciples seemed sounder or more attractive than Constructive principles but because the Conservative party had worn out its toler ation among voters. The new deal experi ment of the Conservative government in stead of winning support for Premier Ben netta administration atlenated support

The decisive Conservative defeat there fore, means chiefly that the outs have a chance to move in There is no fundamental difference between the two major parties In 1930 the Conservatives were elected to combat the depression. After five years voters are tired of one party a methods and are ready to give the opposition party a chance The beral party incidentally did not expend much effort on the election lies leaders knew that if thry sat light and made no misinkes success would full into

The election was not a decision between conflicting principles but rather an appor tunity for discontenied volers to show their dissatisfaction by throwing out one set of lik has and throwing in another set All the reigning party could do was to defend its record (We have brought Canada through the depicesion) and in the final analysis the record was not found accent able to the majority W L Mackenzle King forr or premier who now returns to power will attempt to do what Promier Bennelt was unable to do-convluen Cancila that he has the accret of dissolving the hard facia of the depression in a magic solution

What Is It?

It's amusing to untch attempts to class sify the Rossevelt administration. Old fashioned Democrats don't want to be blamed for its policies and new dest Demo crats say it is more like the old deal than the new deal of their effervescing imagina

Rapublicans orings under the charge that the new deal has borrowed their philos(fh) of a strong control government and relati ate by comparing it with the fuscist philo nophics of Europe Obviously however it is not comparable with the fascist regimes of Germany and Italy

Fascism is primarily interested in the preservation of the capital structure. In the United States the capital structure threatened by the new deal according to its defenders They charge that the Roosevelt administration is flirting with socialism Socialists however reply indignantly that it

is doing nothing of the kind. In the presence of so many refusals to claim it the confused citizen doesn't know what to believe Apparently thats the big gest difficulty of new deal leadership at the moment It has seemed to be so many different things no one knows what it is

Much Ado.

Thousands of young men and women throughout the United States are getting outside help which enables them to attend college Some ofthe young men are foothall players Some of them are football players first and students afterward but not all of them by any means

Gov. Daveys recent remark about foot hall being the supreme surpose of educa tion may have been, as the governor now says it was a joke But the fact is it wasn't taken as a joke Certainly the Ohio State football players whose jobs in Columbus were given widespread publicity as a re ault of Gov Davey a fight with the university can't be expected to see the funny

If there is anything culpable in the arrangement whereby students are able to get emplorment to help defray the expenser of their education, the students are not to be blamed for it Whether or not they happen in be good football players does not affect their standing If a student who shows

The state of

promise of being a crest to a college is able to win a acholarahip or even to get a job certainly an outstanding athlete should be granted the same privilege A football play er incidentally would arem to have as much right to hod a state job as a ward heeler

Annually the United States gets excited ever the fact that football players are helped with their educational expenses. Apjarently Gov Dave, will get credit for starting the furor in 1835. It as a distinction of dubious worth and will continue to be so until someone explains why young men who play football should not have as good a claim to outside help in paying their school expenses as young men who can t play football

Close Harmony.

Quick denial of participation in a achema to pledge Ohlos delegation to next years Republican convention to former President Hoover seems to indicate that this states Republican leaders are more interested right now in harmony than in commitments it is a reassuring sign, for without barmony commitments are empty

The otherne as it exists in a equiation would pack the Onio delegation with Hooser men They would go to the con ention leading a stalking horse perhaps former Gov Myers 1 Cooper In case of a deallock the delegation would shout Presto and the stabling horses place would be taken by Mr Hoover In the thrulog excilement Mr Hoover might get enough votes to win the nomination

The idea might be called preposterous if it were safe to call anythin, preposterous ir politics. Since it land sufe, perhaps the next less adjects e is interesting in all probabilly where there is smoke there is fire. The idea may have occurred to one or more Ohlo Republicans It may have been given serious consideration. On the other hand it may have been given more serious cansideration by their opponents than by Republicans thems bys. Such things happen in politi -

Former Gov. Cooper seems to jul the case nuttly when he sis. The people of the state are anxious for pulty harmony and a winning ticket. The lenders are of one mind that the Ohio delegation should go to the convention with a favorite son and are ready to support the most available mun who could win the election. It is not Impossible that when the time comes Herbert Hoover will seem to be the man But by the same token that nothing is loo preposterous to be tried in politics hardly anything can be predicted with absolute Certainty in collice From a purchy practical stanipaint the proposal to commit the Oblo delegation to Mr Hoovet or anyone else so long before the consention is

The secret worry of the new

but prices
Their economists have worked up some private suports indicating that prices may be expected to advance strongly in the near future the cost of living may be increased out of proportion to the cu rent national income. That would mean plent of trouble because wage increases always lag behind pice in creases to a point where real ha d ships would fall on the bulk of the

ships would tail on the bilk of the voters in the great middle classes. The most conservative inner estimate is that the precelevel now around 81 will increase to \$5 or 90 as a general average for next year. The outside guess is 100 (the 1926 level)

Louth
Lducators are becoming in crusingly restive about the new deal failure to do more for youth Most of them regard the nationa Most of them regard the national pouth administration as nothing but a political loke. A group is framing a comprehensive youth program which will be urged on the President within a few months with all the pressure its sponsors can command.

The plan is based on the principles laid down by the White ciples laid down by the White fleure conference on child health and protection called by President Hoover in 1930. These principles were warmly indorsed by

dent Hoover in 1930 These principles were warml, indersed by Mr Hoover himself—but no one has ever attempted to carry them out. Those behind the idea hope the political angle will stimulate Roosevelt to action. The program will be very broad—involving an appropriation of \$500 000 000 or more to feed un dernourished children (extimated at 10 000 000 out of a school population of 23 000 000) give them adequate schooling regular med-

recreation on a large scale as a deterrent to crime It will be argued that the plan will largely pay for itself in crime prevention alone Also it would provide thou alone Also it would provide thou stands of jobs for yourg higo school and college graduates as teachers dentists doctors and raccreational directors—thus taking care of an important element whose hopeless outlook and bitter dislitusion is at present a serious social problem. The plan is not quire and to be sample—but you'll ready to be aprung—but you!! hear a lot about it later Social

WE MEAN JUST THIS. We have the oil that automotive engineers have always wanted-the oil that every refiner has been trying for years to make!

It's an oil that gives you the lightning like action of a light oil when cold and still has the lubricating body of a heavy oil when bot.

Esso is actually two oils in one! It's an oil that serves a dual purpose. No longer do you have to choose

between an oil that will give you easy starting and one that will give you unfailing protection on a long, hard grind. You get both of these in this one oil!

And to top all this, Esso is the lowconsumption motor oil made. You'll add fewer quarts between drains than with any other oil you can buy. Esso is the world's finest lubricant.

One of a series of Associated Press shetches telling about the usen who occupy the governors' chairs in the various states.

The Governor Of Delaware

C. Douglass Buck was only 36 when Delaware elected him governor in 1926. If that was governor in 1926. If that was not a distinction he earned one four years later, becoming the only man to serve two terms. The current term ends in January, 1937... Buck married the boss daughter. His career began as an engineer for the late Senn for Coleman duPont on a road project which was the trailliazer for Delaware's present highway system. He married the senator's daughter. They have several children and live at Buena Vista, near New Castle, where the governor was born. He stepped into the governorship from the office of chief engineer of the highway department. He is the Republican na-

aware and finds time to be president of a Willmington trust company. His advice to the genlation is heard and heeded.
